What is WevoPBX

- WEVO developed Open Source Linux OS.
- IPPBX meet Unified Threat Management (UTM)
- Linux OS is based on well known robust distribution
- Package as hardcoded firmware with upgradable & installable module features

Why WevoPBX?

- Built on security **hardened firewall** platform. A full fledge Unified Threat Management out of the box.
- **Highly Scalable** from low cost fan less system to multiple server clustering.
- OS packaged as hardened small firmware. Extremely portable, easy maintenance for recovery and restore. A simple Linux knowledge is enough.
- Highly customizable as WevoPBX is based on Open Source platform.
