

" Are your telephone bills still skyrocketing even with discounted call services? Do you know who are making the calls? Do you know where are the calls coming from or going to? How do you keep track of your organisation's telephone calls?"

eBill is a subset component product of iPhone which is part of the MIND<sup>TM</sup> integrated office operations and management solution. It is a very powerful and innovative call management and tracking system. eBill captures all incoming and outgoing calls from either PABX or a keyphone. eBill's database logs automatically in real-time call details such as telephone number, destination, extension and duration. There are over 60 reports to choose from. Additional reports can be customised too.

## **Features**
